In the shifting terrain of [entrepreneurship](#), systemic barriers continue to limit women’s access to capital, mentorship, and scalable platforms. [AIM Elevate Ventures](#), founded in 2024 by tech veteran and Wharton alumna Ira Agarwal, enters this space with a sharply defined mission: to architect an [inclusive innovation](#) ecosystem that accelerates [women-led ventures](#) using the strategic power of technology.

With over two decades of experience in the IT industry, Agarwal observed a recurring disconnect—while digital transformation was reshaping industries, women entrepreneurs often remained at the periphery of this revolution. AIM Elevate was conceived not just as a funding vehicle but as a digitally-native platform engineered to dismantle entry barriers, integrate underserved founders into the tech economy, and scale impact with measurable outcomes.

The platform’s architecture is designed for end-to-end enablement. It offers integrated modules that cover startup financing, AI-powered mentorship matchmaking, on-demand business advisory, and data-driven progress tracking—essentially functioning as a full-stack growth engine for small-scale entrepreneurs.

AIM Elevate Ventures is a one-stop Digital Platform, powered by Innospark Accelerator and a Co-creation Innovation Hub,

leveraging a digital-first infrastructure to rapidly onboard entrepreneurs, deliver real-time performance feedback and build seamless cross-border collaboration. The platform leverages cutting edge digital technologies, and community-led knowledge hubs to help founders build operational resilience.

In its first six months, the platform has supported over 60 ventures—80% women-led—enabling average revenue growth of 45%. Beyond financial metrics, the platform has catalyzed the adoption of circular economy principles and green technologies in five ventures, embedding sustainability at the core of business models. More than 1,200 jobs have been created, demonstrating how tech-enabled micro-entrepreneurship can ripple into macroeconomic gains.

Forbes, Wharton@Work and other industry observers have recognized AIM Elevate as a model for inclusive innovation. As it gears up for global scale, the platform is investing in Agentic & Generative AI and adaptive learning ecosystems to continually tailor support for diverse entrepreneurial journeys.

AIM Elevate Ventures exemplifies how platform thinking, when aligned with social intent, can create structural shifts in entrepreneurship. By embedding technology at every stage of the founder journey, it is not only empowering women—it is redefining what inclusive, tech-led growth looks like in emerging economies and beyond.
